WORKING WITH CRANE

Thank you for your interest in working with Crane Builders, LLC. We pride ourselves on having great relationships with our homeowners. In our experience, this requires open communication. To get started, please answer the questions below to help us determine if we have the ability to meet (and hopefully exceed) your expectations.

...

1. Please describe the scope and location of your project. Do you have plans and mechanical drawings stamped by an engineer or architect? Are you in a flood zone? Do you have an elevation certificate?
2. Is this project a new build or renovation?
3. Has this project been started by another contractor or trade professional?
4. Is this your permanent home or vacation home?
5. Will you be living onsite during construction? Will we be able to access the jobsite by 7am daily M-F?
6. What is your timeline for starting? What is your ideal timeline for completion?
7. What is your budget? If you are financing the project, have you already secured funding?
8. Are you bidding this project out with other contractors?
9. Are you planning to furnish any of the materials and/or fixtures yourself?
10. Please list any architects, engineers, designers and/or subcontractors that you have preselected.
11. What are your main concerns when hiring a contractor? What questions can we answer for you?
